About This Game

BattleCore Arena

Midway between a shooting game and a game of skill, BattleCore Arena is a multiplayer game in which you control a Core you will have to maneuver to eject your opponents from the platform in order to win.

We wanted a fast and dynamic game, so we got rid of everything unnecessary. This will allow you to focus on piloting your Core to be mobile and reactive, so that at every moment you will be able to flee or run after your opponents. You will also have to be careful of your shooting accuracy to eject and destroy your enemies.

Moreover, thanks to our customization options, you will be able to control a teapot or a light bulb, as well as a skull or a pig. Your Core's armor and its lights are also customizable.

A game of BattleCore Arena is played according to the "3v3 Backup" rules.

As its name implies, two teams of three players compete against each other. Each team has 10 backup points, and when a player is ejected from the arena, he reappears consuming one backup point.

Once a team drops to 0 backup point, its players cannot reappear, reducing the number of players at the end of the game, for a final rise in tension.

oh came here cos the game looked good

and \
i already own it .. oh ..

heads back too play some for a bit

. A unique platformer with colorful graphics, also it has a workshop.. I have loved this game since Floyd hit Eastern North Carolina (I know, odd relation but thats when I was introduced to it). I've been waiting and hoping they would release it for ps4 or at least make it compatible. But VOILA! Steam got it first and I couldn't be happier. Crystal Method will have you rocking out and the psychadelic tunnels will have you completely zoned into the game. Absolutely recommend!!. Does not work with Oclulus Touch and is farily boring.. bought it durring the sale and its a pretty terrible game not even worth 1 dollar. but if you want to buy someone a game and have them commit suicide it makes a perfect gift.

This is one simple, fast and fun roguelike. It doesn't take a wiki to learn but has plenty of depth in decision and strategy. Like most roguelikes luck plays a significant part but the game does a good job of giving you options.. Outdated graphics but, pretty nostalgic.. Great game , eager to play the next one Zombie exodus safehaven.. In the beginning was the Metal, and the Metal was ♥♥♥♥, and those who followed the way of the Metal strived for all their lives to be METAL AS ♥♥♥♥!

Another great RPG by Crankage games. Metal as ♥♥♥♥ takes a not-so-serious look into Metal culture, and builds a hilariously entertaining lore around it. Like all Crankage games, the interface is easy to learn, however the creatures in MaP present an enjoyable and challenging level of difficulty which keeps the player engaged for the long haul. The awesome music only serves to heighten the overall feel of the game, thoroughly enveloping you in an atmosphere of swords, magic, weed, and adventure. So if you're an old metal head stoner from the 80's, or just someone who enjoys a good laugh while having a lot of fun, cancel your Saturday night D&D game and get yourself a copy of Metal as ♥♥♥♥, the game so Metal it almost brought Dio back from the grave.. Happy Room is the best 'torture simulator' I have played in a while. This game is incredible and I love it very much so far. I think the only thing i want right now is for sandbox to be unlockable from the start as right now, it feels repetitive just to get access to sandbox. It has a very nice gameplay but has been brought down by the repetitive gameplay. I am hoping this will be improved and the community will grow. Want to find out what I think of this game?

Audio - The audio is pretty funny to be honest. It sounds nice and joyful although you are torturing someone to death. To me, that sounds nice :). This game is good but no better than another games under 25.00e > I don't recommend this game because i have only 40fps :(Thy Sword is a true love letter to old school games. It finds this perfect spot between arcade style and RPG style. Gameplay is tense, there is good feedback, the graphics are gorgeous (a least for retro lovers) and the music is a perfect fit.

Combat is twitchy and arcade oriented. Every enemy has it's own attack/defense pattern that must be mastered in order to excel at the game. The bosses are well designed and quite central to the game. Between each level the village area allows to buy potions and/or new equipments. Also it's possible to play 21 horsemen, a gambling game inspired by blackjack. A nice way to make quick money... or loose everything.

The default game mode is inspired by arcade game, you basically have 3 credits to win the game, after that you have to start over. But there are also an easy mode (unlimited credit) and an hardcore mode (1 credit I guess). There are two playable classes: one melee oriented and one ranged oriented. One of my only complaint about the game is that we cannot choose a magic user and the two existing classes are quite similar.

So far I'm half way through the game (at least through the map). From what I have seen so far I can only recommend the game for anyone loving good old arcade with light RPG elements that takes true mastery to finish.. **-Video Review-**

If you want a written version of the review, I am providing a "normal" written review which will contain more of a standard review review, they will not be exact copies, I'll move more of my humor into my video review, so please do check it out if you have the time! If not, read on!

-Quick Review-

Imperium Romanum: Gold Edition is a Roman City Builder Simulation game developed by Haemimont Games and released Oct 30, 2008. Haemimont Games published another similar game people are probably **more** familiar with: "Tropico 4".

-Detailed breakdown review-

Story: The setting for the whole game is that you're the governor of a Roman city/Provence. It's up to you to provide/grow food, distribute that food, manage housing and logistics of laborer's (*That's my fancy way of saying "slaves"... It's ancient Rome, calm down*), and generally provide for your people's needs. Have you ever played the sim's? Imagine having a bunch of them, but they all collectively want close to the same thing at the same time... That being sausages or bread.

Gameplay: The controls of the game are almost identical to Tropico 4, so when I started playing the game I was able to get the hang of the wonky camera controls relatively quickly. middle mouse wheel to scroll in and out, arrow keys to speed your camera around. I'll warn you right now, generally learning the basic game camera movement functions is a learning curve, which will be a thorn in many people's sides.

You also can adjust the direction your buildings are being placed with the scroll wheel, I believe you can adjust the game
